EDUCATION

Mahindra University

Hyderabad, India

Bachelor of Technology in Computer Science Engineering — CGPA: 8.2/10

Aug 2023 – Present

Relevant Coursework: Machine Learning, Deep Learning, Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Operating Systems, Theory of Computation, Object-Oriented Programming

PROJECTS

MeshRelief — Offline Emergency Mesh Communication System

May 2026 – Present

GitHub — Hackathon Certificate

- Developed an offline-first emergency communication platform enabling information sharing without internet, cellular networks, or centralized infrastructure.
- Engineered a multi-hop message propagation system that relays emergency alerts, safe routes, and aid information across nearby devices.
- Implemented dual communication modes using QR-based visual relay and Android-native peer-to-peer transfer through Nearby Connections.
- Designed message synchronization, deduplication, expiry management, and hop-count control mechanisms for efficient offline networking.
- Built a Progressive Web Application (PWA) with offline caching, local data persistence, and privacy-focused device identification.
- **Tech:** React.js, Tailwind CSS, Vite, Capacitor, Nearby Connections API, Workbox, QR Technologies

ItemLend — Peer-to-Peer Item Lending Platform

Apr 2026 – May 2026

GitHub

- Developed a full-stack platform that enables students to lend and borrow items through a trust-based points economy.
- Engineered a points wallet and trust score system to incentivize responsible borrowing behavior and automate transaction workflows.
- Implemented real-time messaging using Socket.io, allowing verified users to securely coordinate lending activities.
- Designed KYC verification, item marketplace management, and user authentication workflows for secure platform operations.
- Built scalable RESTful APIs and database models to manage users, transactions, trust metrics, and inventory records.
- **Tech:** React.js, TypeScript, Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS

Social Media Analytics Dashboard

Mar 2026 – Apr 2026

GitHub

- Developed a responsive analytics dashboard to monitor follower growth, engagement trends, platform distribution, and content scheduling.
- Engineered interactive data visualizations using Recharts, including line, bar, and pie charts for social media performance analysis.
- Implemented KPI tracking modules, sortable post-performance tables, and calendar-based content scheduling features.
- Designed a mobile-first responsive interface using CSS Grid and Flexbox, ensuring seamless usability across devices.
- Built reusable React components and API-ready frontend architecture to support future real-time data integrations.
- **Tech:** React.js, JavaScript, Recharts, CSS Grid, Flexbox, Axios

SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, C

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Recharts

Backend: Node.js, Express.js, REST APIs, Socket.io

Databases: MongoDB, PostgreSQL

Tools Technologies: Git, GitHub, Linux, Vite, Capacitor, Progressive Web Apps (PWA)

Concepts: Data Structures Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) AI Foundations Certification ([View Certificate](#))
- Oracle Cloud Infrastructure (OCI) Generative AI Professional Certification ([View Certificate](#))
- Hackathon First Place in Web-Dev ([View Hackathon Certificate](#))
